

Customized Da Goose Mastering DDP Player (V2.0 17-07-2018)

For customer reference and playback I have a customized DDP player ready for download. Below are the download links for our customized DDP Player for Windows and Mac.

[DDP Player Mac](http://www.dagoosemusic.nl/mail/ddpp3000Dagoose.pkg.zip) (http://www.dagoosemusic.nl/mail/ddpp3000Dagoose.pkg.zip)

[DDP Player Windows](http://www.dagoosemusic.nl/mail/ddpp3000Dagoose.zip) (http://www.dagoosemusic.nl/mail/ddpp3000Dagoose.zip)

To install the DDP Player on both Windows or Mac, follow these steps:

- save the appropriate .zip file for your platform to a folder on your hard drive
- extract the zip file
- run the extracted executable

The DDP Player is now installed. During the first startup you will be asked to enter a key. Your key is:

A5FB-C79A-942F-418A

It's important to double check for errors like ISRC codes, CD-text, UPC/EAN (PQ sheet as pdf) but also check the pauses/flow between all tracks. If everything is OK, send the downloadlink directly to the CD factory.

NOTES:

- On track 1 (index 1) you will see a 2 seconds (00:02:00) pregap, this is correct.
- The ISRC code for track 1 is on track index 0 and the title on track index 1, this is correct.
- Do NOT burn a CD and send that to the factory, send the DDP.
- If the CD factory doesn't support DDP (even for small runs), please choose another factory.

If you any more questions, feel free to ask!

With kind regards,
Jeffrey de Gans | Da Goose Mastering
